Mississippi

Design – Johan Lindstén

JOHANSON

Introduction

Mississippi makes it simple to create seating areas in public spaces that offer seclusion but also invite contact and communication. This flexible, versatile modular system adapts easily to create comfort and convenience in all sorts of settings.

With his design for Mississippi Johan Lindstén has introduced an ingenious new modular seating system to the market, with small tables and other flat surfaces that can be integrated into the seating configuration. The series adapts to the space available and can be placed either against a wall or in the middle of the room to provide access from both sides. It is also possible to integrate planters into the set-up to enliven areas with green accents.

Mississippi is the key to creating flexible seating solutions that combine eye appeal with a high level of comfort in public spaces. Contrast eye-catching colours or choose subtler shades for a more tranquil setting. The design's iconic elegance enables you to use MISSISSIPPI to create appealing settings for both seclusion and conversation.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 400 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 192 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish.

For all colours see www.johansondesign.com

192 Solid collection (gloss 72)
192 Structure collection (matte, textured surface)
15 Pearl finish collection

Recycling

All steel parts are recyclable.
Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minium of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
