Design – Johan Lindstén

# **JOHANSON**

### Introduction

Apex symbolizes the turning point in the complex curve when the ideal line through abend is achieved to maximize the speed of a racing car. These ideal lines and their meetingpoints together defi ne the Apex chair. The sharp expression of the seat off ers a distinct but soft feeling, while the supporting frame limits and defi nes its contours in a bold andembracing manner. The well-defi ned transition between the seat and frame gives a feeling of weightlessness.

## Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

## **Material**

### **Seat - Upholstery materials**

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

#### Multicolour - Finish RAL

Take part in Johanson's color range, 405 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 195 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome or are offered.

For all colours see www.johansondesign.com

#### Recycling

All steel parts are recyclable.

Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minium of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
