Haddoc

Design – Johan Lindstén

JOHANSON

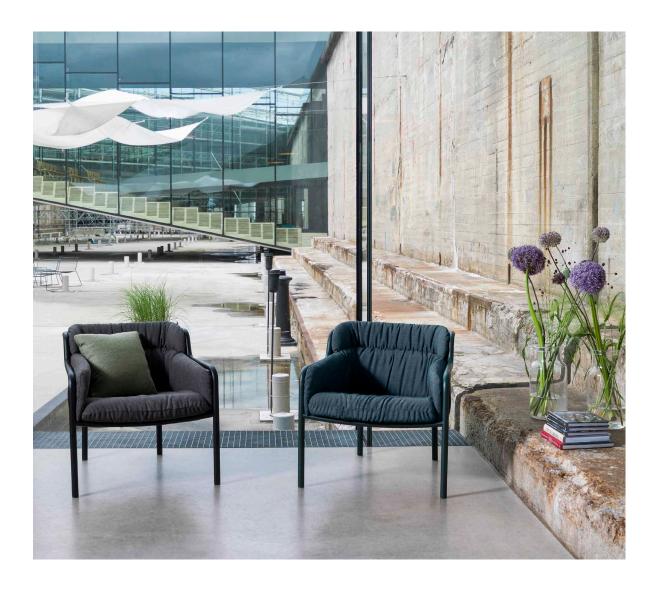

Introduction

The idea behind Haddoc was to create a series of seating furniture that is so inviting and comfortable that it promotes relaxing breaks in an ergonomic sitting position. Comfort was key to the design process where an air of lightness and strong character form the basis of Haddoc.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials

Multicolour - Finish RAL

Take part in Johanson's color range, 405 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 195 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome are offered.

For all colours see www.johansondesign.com

Accessories

Connector

08-base

Stacking trolley

Stackability for each chair can be found under facts.

Connector

09-base

Wheels

Wheels for 05-base in black, white and chrome.

Extra

Wheels, tilt mechanism and height adjustment for 05-base. Felt gliders

Facts

Material

The seat is made of wood and polyether. Foam which meets the highest fire classification CMHR- Combustion Modified High Resilience, is available for all models on request. The base is made of finished/lacquerd metal.

Certificate

• Fire certificate (Danak)

BIM - objects can be downloaded at johansondesign.com

Recycling

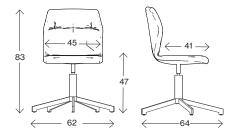

All steel parts are recyclable.

Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minium of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
