

Madison

Design – Alexander Lervik

JOHANSON

Introduction

Madison's simple, clean and strict lines are characteristic of Johanson's timeless Scandinavian designs. Thanks to its adaptable base, the table can accommodate a wide variety of top sizes and tables can be readily placed in a row next to each other. "This makes it easy to create a really long conference table," Alexander explains.

Designer

Alexander Lervik is one of Sweden's most well-known designers, collaborating with a number of national and international producers, including Moroso, Zero, Designhouse Stockholm and Johanson. Though his main focus is lighting, furniture and product design, he also creates concepts for hotel and restaurant interiors and collaborates with fashion brands.

Recycling

All steel parts are recyclable.

Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.

Material declaration

For more information about the product please download material declaration on our website, under Downloads à Product Information at www.johansondesign.com

Table tops

Discus

Chamfered edge with thickness 25mm. MDF with laminate or veneer in different executions.
