

# Edith

Design – Alexander Lervik

**JOHANSON**

## Introduction

Edith is an armchair that looks just as good in a public space as it does in a private one. Edith is going to be your new favourite armchair – the one you don't want to leave once you sit down in it. Alexander says:

"I was listening to Edith Piaf when I was designing this chair and thought: this chair is going to be extremely comfortable so that you can sink into it, disappear into a world of your own and enjoy listening to music for total relaxation. I wanted the armchair to have an identity yet still feel light in design."

## Designer

Alexander Lervik is one of Sweden's most well-known designers, collaborating with a number of national and international producers, including Moroso, Zero, Designhouse Stockholm and Johanson.

Though his main focus is lighting, furniture and product design, he also creates concepts for hotel and restaurant interiors and collaborates with fashion brands.

## Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

## Multicolour - Finish RAL

Take part in Johanson's color range, 400 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 192 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish.

For all colours see [www.johansondesign.com](http://www.johansondesign.com)

## Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.

## Material declaration
