Testing of tables according to EN 15372:2016

(3 appendices)

Customer:	Johanson Design AB
Test object/ID:	Table/Eye Table H55 Ø65
Test method:	EN 15372:2016 Furniture - Strength, durability and safety - Requirements for non-domestic tables. Test severity 2
Scope:	Complete test
Date of test:	2021-05-19 – 2022-06-01
Test result:	The tested object passed the test
Reservation:	The test results in this report apply solely to the specimen tested
Test environment:	23 ± 2°C and 50 ± 5% relative humidity
Measurement uncertainty:	Decision rule according to EN ISO IEC 17025:2018 clause 3.7 No account is taken of measurement uncertainty when reporting numerical results

Appendix 1

Test result

Abbreviations: N/A = Not applicable
N/T = Not tested

Table 1

1.	General requirements	EN 15372:2016	Results
1.1	<p>The table shall be designed to minimise the risk of injury to the user.</p> <p>All parts of the table with which the user comes into contact during intended use, shall be designed so that physical injury and damage are avoided.</p> <p>This requirement is met when:</p> <ul style="list-style-type: none"> a. edges of tabletops which are directly in contact with the user are rounded or chamfered, b. all other edges accessible during intended use are free from burrs and/or sharp edges, c. ends of hollow components with a diameter greater than 7 mm and less than 12 mm where the accessible depth is greater than 10 mm, are closed or capped. <p>Movable and adjustable parts shall be designed so that injuries and inadvertent operation are avoided.</p> <p>It shall not be possible for any load bearing part of the table to come loose unintentionally.</p> <p>All parts which are lubricated to assist sliding shall be designed to protect users from lubricant stains when in normal use.</p>	5.1	Pass

Table 2

2.	Shear and squeeze points	EN 15372:2016	Results
2.1	<p>There shall be no shear and squeeze points created by parts of the table operated by powered mechanisms, i.e. springs, gas lifts and motorised systems.</p> <p>There shall be no shear and squeeze points created by forces applied during normal use.</p> <p><u>Note!</u> Shear and squeeze points that are created only during manually setting up and folding are acceptable, because the user can be assumed to be in control of his/her movements and to be able to cease applying the force immediately upon experiencing pain.</p>	5.2	Pass

Appendix 1

Table 3

3	Strength, durability	EN 1730:2012	Cycles	Load	Results
3.1	Horizontal static load test - Type 1 ¹ - Type 2	6.2	10 10	400 N 200 N	- Pass
3.2	Vertical static load test on main surface	6.3.1	10	1250 N	Pass
3.3	Additional vertical static load test where the main surface has a length > 1 600 mm	6.3.2	10	1000 N	N/A
3.4	Vertical static load test on ancillary surface ²	6.3.3	10	300 N	N/A
3.5	Horizontal durability test	6.4.1 6.4.2	15 000	200 N	Pass
3.6	Vertical durability test (For cantilever or pedestal tables)	6.5	15 000	300 N	N/A
3.7	Vertical impact test (for tables with glass in their construction) - Safety glass ³ - Other glass	6.6.1 6.6.2	10 10	180 mm 240 mm	N/A N/A
3.8	Vertical impact test for all other tabletops	6.6.1 6.6.3	10	180 mm	Pass
3.9	Drop test ⁴ (for tables weighting more than 20 kg) Tables without glass (max 100 mm) Tables with glass (max 50 mm)	6.9	6 6	- -	N/A N/A
3.10	Stability under vertical load test ⁵ - Main surface (max 400 N) - Ancillary surface (max 200 N)	7.2	1 1	200 N -	Pass N/A
3.11	Stability for tables with extension elements	7.3	1	200 N	N/A

¹ Type 1 tables have a main surface 600 mm or more above the floor surface and a surface area greater than 0.25 m². All other tables are considered as Type 2.

² A table extension added in the centre of the table shall be considered as the main surface. A part of the main surface in the unextended configuration may become an ancillary surface in the extended configuration.

³ Glass is considered to be safety glass if the glass fulfils the requirements in EN 12150-1:2012, Clause 8, fragmentation test; or where the mode of breakage (β) according to EN 12600, is Type B or Type C.

⁴ Determination of drop height are calculated according to table 1 in EN 1730:2012.

⁵ Loads for stability tests are calculated according to table 2 in EN 1730:2012

Appendix 2

Test object

Test object/ID: Table/Eye Table H55 Ø65

Dimensions ¹

Width: Ø 650 mm

Height: 550 mm

Mass: 12.8 kg

Components

Tabletop: Veneered tray, particleboard, 19 mm

Bottom: Particleboard, 19 mm

Frame: Fibreboard 2 mm, flexible foam

Castors: Ø39 mm

Sampling: The test object was selected by the customer

Date of arrival at
RISE test laboratory: 2021-03-19

Observed defects before testing: No defects

¹ The dimensions are only intended to unambiguously identify the test object and do not claim to be metrologically accurate
