Design – Johan Lindstén

## **JOHANSON**

### Introduction

The need for flexible working spaces, areas for informal meetings or an extra "hot desk" is increasing all the time. To meet this rising demand Johanson is proud to present a flexible "side table" – a height-adjustable table that is easy to move to wherever it is needed and where a computer is as much at home as a coffee cup.

### Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

#### Recycling

All steel parts are recyclable.
Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minium of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
