

Dandy

Design – Alexander Lervik

JOHANSON

Introduction

Davyd has been something of a design experiment for Alexander Lervik. "I wanted to create a chair in a way I never have before – a chair that would be easy to move around in various environments, but one that would also offer the utmost in comfort. In order to achieve this, I realised that we would have to come up with different solutions that didn't involve using wooden seats or the like. The result is a chair made from thin tubing with an inner seat of webbing and feathers, then draped with a cover in fabric or leather.

Designer

Alexander Lervik is one of Sweden's most well-known designers, collaborating with a number of national and international producers, including Moroso, Zero, Designhouse Stockholm and Johanson.

Though his main focus is lighting, furniture and product design, he also creates concepts for hotel and restaurant interiors and collaborates with fashion brands.

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 405 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 195 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome are offered.

For all colours see www.johansondesign.com

- 195 Solid collection (gloss 72)
- 195 Structure collection (matte, textured surface)
- 15 Pearl finish collection and chrome.

Accessories

Connector

09-stativ

Extra

Felt gliders
Stacking protector (standard)

Stacking trolley

Stackability for each chair can be found under facts.

Facts

Material

The seat is made of wood and polyether. Foam which meets the highest fire classification CMHR- Combustion Modified High Resilience, is available for all models on request. The base is made of finished/lacquered metal.

Certificate

- Fire certificate (Danak)

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
