

Lindy

Design – Fredrik Färg & Emma Blanche

JOHANSON

Introduction

This discreet but distinctive feature is a little cast aluminium coupling that links the upper part of the frame to the legs. The elegantly constructed metal underframe is almost organic in its lines, and the coupling, which can be lacquered in a contrasting or matching colour, finished in textured lacquer or selected in anodised aluminium, adds that special extra something to the overall expression.

LINDY is available as a café table, a bar table, a dining table or a conference table in different heights and sizes, with a generous choice of tabletop options.

“It’s our guess that users will find any number of different ways to use LINDY in every environment from restaurants and hotels to schools, workplaces and domestic settings,” say Färg & Blanche.

Designer

Stockholm based design studio Färg & Blanche is known for their experimental stance, where each expression informs the other, they effortlessly move between the exclusive hand made one off and the industrially produced, without ever losing their distinctive touch.

Recycling

All steel parts are recyclable.

Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
