

Plus

Design – Alexander Lervik

JOHANSON

Introduction

The plus sign on the backrest is the symbol that identifies the chair and gives it its name. “I wanted to give the chair a strong identity. When I was thinking how best to fix the backrest to the frame, it struck me that I could let the head of the screw that holds the back in place have the form of a graphic symbol. That’s how PLUS was born. A chair designed to combine the highest possible environmental profile with a minimal cost. That’s exactly the kind of product the market is looking for right now,” Alexander explains.

Throughout the entire development process the focus has been on finding manufacturing methods that minimise material use, not only in order to ensure an attractive price level, but more importantly to reduce climate impact. Stackability is always a key factor for the functionality of chairs used in public spaces. For that reason PLUS has been designed both to offer good seating comfort and to optimise the potential to stack the chair when it is not in use.

Designer

Alexander Lervik is one of Sweden's most well-known designers, collaborating with a number of national and international producers, including Moroso, Zero, Designhouse Stockholm and Johanson. Though his main focus is lighting, furniture and product design, he also creates concepts for hotel and restaurant interiors and collaborates with fashion brands.

Facts

Plus in detail

Separable

Facts

Material

Recycled PP (Polypropylene).
The base is made of finished/lacquered metal.

Fire classification

All products meet Möbelfakta's fire requirements. All polyether/foam are tested to Cal TB 117. All standard fabrics meet EN 1021:1 & 2. Other classification, for example BS 5856 (Crib 5) on request, please contact customer support.

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
