

Ava

Design – Böttcher & Kayser

JOHANSON

Introduction

The new AVA sofa series has been specially designed by Böttcher & Kayser to meet the ever-increasing demand for and interest in furnishings that lend a cosier, more domestic feel to public spaces.

The key to success here lies in combining comfort and convenience with a high content of design – a specification that AVA meets in all respects. The appealing lines, soft yet supportive upholstery, modular seating units and loose back-cushions all play their part in ensuring that users perceive a high level design and experience a high degree of comfort.

The basis for the AVA series is a number of square and rectangular elements that make it possible to vary the size and shape of seating arrangements to meet differing needs in a variety of settings and spaces.

Thanks to the flexibility of the manufacturing process and the expertise of the Johanson team, AVA can be covered in most types of textiles to meet the wishes of architects and interior designers. This helps ensure that AVA is at home in both conventionally furnished public spaces and in environments where the mood is more relaxed.

Designer

Böttcher & Kayser is a Berlin-based studio founded in 2007, working in the fields of consumer product, furniture, lighting and interior design. Moritz Böttcher and Nikolaus Kayser have been rewarded with several prestigious awards such as the Interior Innovation Award, several iF Design Awards and numerous Red Dot Awards – including the award, Best of the Best' in 2013. Their projects have been published in books and magazines around the world.

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Facts

Material

The seat is made of FSC certified wood and padding is made of polyether/foam.

Fire classification

All products meet Möbelfakta's fire requirements. All polyether/foam are tested to Cal TB 117. All standard fabrics meet EN 1021:1 & 2. Other classification, for example BS 5856 (Crib 5) on request, please contact customer support.

Certificate

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
