Design – Johan Lindstén

JOHANSON

Introduction

It has long been an ambition to create a chair that offers the very best in seating comfort and yet is not only lightweight and stackable, but also made from recycled materials. Pelican which was launched spring 2020, designed by Johan Lindstén, and is a sleek-looking chair with gently rounded lines produced by recycled plastic materials.

Pelican is the first chair in Sweden to be awarded the EU Ecolabel and is the answer to many customers'

wishes, while challenging attitudes on the choice of materials at a time when sustainability and environmental issues are high on the agenda. We consulted with experts from the plastics, recycling and manufacturing industries at an early stage of the development process, using their collective input to create the best possible foundation on which to build a successful project. The recycled plastic comes from a Swedish supplier.

Pelican - a sleek-looking chair with gently rounded lines produced with recycled plastic materials, and is the first chair in Sweden to be awarded the EU Ecolabel.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 405 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 195 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL colors with pearl finish and chrome or polished aluminum are offered.

For all colours see www.johansondesign.com

Connector

08-base

Wheels

Wheels for 03-base in black, white and chrome.

Connector

09-base

Fixed Tablet (08-46)

Fixed writing tablet in CDF. White with black core. Writing tablet is supplied for right-handed as standard and left-handed as alternative.

Stacking trolley

Stackability for each chair can be found under facts.

Writing tablet (09-46)

Practical foldable writing tablet in CDF. White with black core. Writing tablet is supplied for right-handed as standard and left-handed as alternative.

With the chair stacked on our trolley you can easily place and move up to 20 Pelican depending on the choice of base. The Pelican chair with upholstered seat is not suitable for storing stacked as pressure marks may occur.

Extra

Quilting
Felt gliders
Stacking protection (standard)

Tilt mechanism and Height adjustment

Height adjustment for 03-base. Pelican is delivered with a Flex-tilt mechanism as standard.

“It has long been an ambition to create a chair that offers the very best in seating comfort and yet is not only lightweight and stackable, but also made from recycled materials.”

Johan Lindstén

Facts

Pelican in detail

Separable

Facts

Material

- Recycled PP (Polypropylene).
- Percentage of recycled plastic: 40 – 100 %.
- Reinforcement: 20 % fiberglass.
- The recycled plastic comes from the food industry.
- Stacking protector- 100 % recycled material

Fire classification

All products meet Möbelfakta's fire requirements. All polyether/foam are tested to Cal TB 117. All standard fabrics meet EN 1021:1 & 2. Other classification, for example BS 5856 (Crib 5) on request, please contact customer support.

Certificate

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
