

Speed Table

Design – Johan Lindstén

JOHANSON

Introduction

A side table with clear identity. Although Speed was designed as a side table it can also be used as a coffee table. The frame's round shapes create a soft feel. Speed comes in two heights that also look good when placed together. In a simple, yet eye-catching design, this versatile piece has a wide range of uses.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Material

Seat - Upholstery materials

Johanson offers a very generous range of fabrics, leather and artificial leather from the most reputable suppliers in the world. Should any other material be desired despite the wide selection, it is also possible to suggest other materials. Johanson does not charge start-up costs for handling non-standard materials.

Multicolour - Finish RAL

Take part in Johanson's color range, 405 variants of different finishes are offered as standard on steel frames and metal details. Choose from all 195 RAL colors, alternatives are available both as solid finish (gloss 72) or Structure finish which has a matte, slightly textured elegant surface. In addition, 15 RAL-Farben mit Perlmutteffekt sowie Chrom wählbar.

For all colours see www.johansondesign.com

195 Solid collection (gloss 72)

195 Structure collection (matte, textured surface)

15 Pearl finish collection and chrome.

Table tops

Discus

Chamfered edge with thickness 25mm. MDF with laminate or veneer in different executions.

Finish	Description	Edge

Kvadrat Really	Cotton White	ABS-edge

Other

Besides our standard range of veneer, laminate, stain and lacquer-colours we can offer customized solutions.

Facts

Material

The base is made of finished/lacquered metal.

Certificate

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
