

Pelican Bowl

Design – Johan Lindstén

JOHANSON

Introduction

It has long been an ambition to create a chair that offers the very best in seating comfort and yet is not only lightweight and stackable, but also made from recycled materials. Pelican which was launched spring 2020, designed by Johan Lindstén, and is a sleek-looking chair with gently rounded lines produced by recycled plastic materials.

Pelican is the first chair in Sweden to be awarded the EU Ecolabel and is the answer to many customers'

wishes, while challenging attitudes on the choice of materials at a time when sustainability and environmental issues are high on the agenda. We consulted with experts from the plastics, recycling and manufacturing industries at an early stage of the development process, using their collective input to create the best possible foundation on which to build a successful project. The recycled plastic comes from a Swedish supplier.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Felt gliders

Facts

Material

- Recycled PP (Polypropylene).
- Percentage of recycled plastic: 40 – 100 %.
- Reinforcement: 20 % fiberglass.

|

Fire classification

All products meet Möbelfakta's fire requirements. All polyether/foam are tested to Cal TB 117. All standard fabrics meet EN 1021:1 & 2. Other classification, for example BS 5856 (Crib 5) on request, please contact customer support.

Separable

Recycling

All steel parts are recyclable. Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
